Ad 23 & 24. in meo exemplari invenio signum δ inclusum circulo. Id utrum sit ex originali, an à me ipso inter describendum appositum, non memini. Certè locus erat dubitandi, quia 23 multum excedit metas Oloris, & appropinquat Equuleo. Quin etiam 26 cum 7, numeris indicibus, eadem esse videtur. Sed fidem Astronomis meam approbo, communicatione Exemplaris. In 12. & 14. secutus sum consensum Exemplaris mei cum Longimontani. Id semper spectavi.
