### **D**e libra

**L**ibra vero agit in aerem elementum inferendo in illum caliditatem et humiditatem remotam a tempore densans illum et inspissans et faciens ipsum commixtum et nocibilem indumentis speciebus et seminibus et herbis et frondibus arborum ipsorumque fructibus et faciens eum vaporosum vaporibus densis et nocibilibus et similia.

### **D**e aquario.

**A**quarius similiter agit in aerem elementum inferendo in illum caliditatem et humiditatem distemperatam et nocibilem et impedientem faciens ipsum perimentem et destinentem individua specierum: et ut multum illa documenta que animalia et semina et alia vegetabilia recipiunt ab aere: et illi casus et illa impressio sunt ex impressiōnibus quas fecit aquarius in aere et similia.

### **D**e signis aquaticis, et primo de cancro.

**C**ancer vero scorpio et pisces que sunt signa aquatica agunt in aquam elementum sed diversimo de s. quia cancer agit in aquam imprimendo in illam frigiditatem et humiditatem tempatam per quam sit motus nature ad dandū dulcedinem et nutrimentum quibus nutriunt et vivunt animalia et nutrimenta cuncta vegetabilia et similia.

### **D**e scorpione.

**S**corpio agit in aquam elementum inferendo in illam humiditatem et frigiditatem elongatam a temperamento per quam sit motus nature potius ad corruptionem quam ad nutrimentum seu conseruationem propter corruptionem et salsuginositatem quam infert actus scorpionis in aquam paucissimum et paucis rebus valens nutrimentum prestare.

### **D**e piscibus

**P**isces agit in aquaz elementum inferendo in illam frigiditatem distemperatam et nocibilem per quam sit motus nature ad perimendum et destruendum animalia et semina et quasi cuncta vegetabilia propter corruptionem et amaricationem et sedentatem quas infert actus pisces in aqua. **H**ec est causa quare signa sunt. id est tantum nec plura nec pauciora: quoniam elementa sunt tantum quatuor: et signa agunt in elementa secundum tres modos: secundum primum esse nutriendes et augmentantes: secundum
